CS 491/591 Blockchains; HW 4: Project Checkpoint

Prof. Jared Saia, University of New Mexico

In this homework, you will write up a checkpoint for the class project and post it (or a link to it) on the Piazza forum; and also do a 5-10 minute in-class presentation.

Your checkpoint should include the following information, and should be no more than 5 pages. It should clearly address the following points.

1. **Current Results.** What are the current results for your project? This should include information from a literature search, preliminary theoretical and empirical results and experimental setup.

2. **Impediments.** What areas are you currently stuck on, and what do you need to do to resolve those problems?

3. **Next Step and Remaining Steps.** Given the above information, what is the next concrete steps you will take. What are the other remaining steps?
